IS YOUR LAB READY FOR THE NEW UKCA LEGISLATION?

You maybe aware that the the new UKCA marking will replace CE-IVD marking in the UK market from January 2023. This means that as of the 1st of January 2023 all CE-IVD products will also need to be registered and UKCA marked in order to be sold in the UK.

At Newmarket Scientific, we have been working hard to ensure we are ready for this and ensure that all our customers have a smooth transition to the new UKCA marking. Indeed, all our CE marked products from Nordic Biosite's Optibodies range and GenomeMe's GeneAb range are ready and are now also UKCA marked.

This means that that you can order from us with out interruption of supply.

Feel free to get in touch if you have any questions for the requirements of this new legislation or to arrange samples of our CE-IVD UKCA antibodies
